

3) Now the Valuables will be secure.

way.
2) All other items are put in the bag, the usual
the valuables are placed in it (Refer fig 2);
1) The web is pulled out with the handle and

How to Use

7. Refer **FAQ** for further clarification.
6. Fix handle, ideal is a pencil for a handle.
5. Place valuables in this net like material when using the bag.
4. Paste this cardboard to the bottom of the bag.
3. Paste with double sticker, a cardboard 2.5" x 6.5" on to net as shown
2. Cut in to rectangle, 24" in width on 16" weight.
1. Use 1 meter of fishing net with 1" holes.

The THIEF STOP™ for bags

INTRODUCING

that are
SIMPLE 'N' USEFUL

The THIEF STOP Principle
If You CAN'T TOUCH it!
You CAN'T SNATCH it!

Nobody knows there is a flap in these pockets.

Even if he succeeds in touching the valuables the items within the web gets entangled causing a jerk, thus alerting the victim.

- 10) **What is a Big Web?**
Oversize luggages or zipper luggages are cut open and some goods are stolen. To prevent this and for easy packing of bags. (Refer page 12-13)
- 11) **Why have you put a flap only in the left trouser pocket?**

Good question...
This is a habit, firstly men always put their keys and other valuables in the right hand pocket. Therefore as the left hand pocket is not a target to the thieves it gives additional protection. Next the left pocket will be exclusively used from now as habit only to put the valuables and the handkerchief. The handkerchief gives additional protection.

- 12) **Can I make it ?**
Yes anyone who can spare about an hour with patience can make both web or a flap out of materials at home.

Fig 4

- 5) Now the web is ready for use.
- 4) Do the same with all other discs for the other three ends.
- 3) With a double sticker, paste 2 discs together with the of the web in between the discs.
- 2) Cut 8 discs out of strong cardboard 2 1/2" in diameter.
- 1) Cut a fishing net same as for hand bag that will just cover the bag as shown.

How to make Web for Luggage

www.get4p.com

www.get4p.com

- How to Use**
- First place the goods in the bag.
 - Next place the web over the bag so that all four discs are hanging as shown on page 12, fig 4.
 - Insert each disc into the bag so it touches the bottom.
 - See that all sides are covered by the web.
 - Now your valuables have extra protection.
 - In the event goods are packed to bursting point. Place the more important valuables in the bag first, secure web, then place the balance items over it.**

Frequently Asked Questions

(1) **What is a THIEF STOP™?**
It is a device incorporated into pockets and handbags to create a secret compartment to hide valuables. - THE PRINCIPLE IS SIMPLE - IF YOU CAN'T TOUCH IT, YOU CAN'T SNATCH IT.

Secret Flap
When a thief puts his hand in to the pocket he cannot touch the money; the money is safe behind the secret flap.

How to make the THIEF STOP™ Trouser Pocket

www.get4p.com

www.get4p.com

1. Cut **flap** with almost the same dimensions as the shirt pocket (Netting material is ideal).
2. Stitch the flap on inside part of the shirt pocket, it should be placed 2 cm below the top level of the pocket as shown in the diagram below.
3. Secret **flap** is now ready.
4. Valuables can now be placed inside the **flap** by raising it from the bottom end.

Future of the 4P Thief Stop

There will be no pocket without a FLAP
 Beyond all expectations
 THE FLAP
 Was invented To compliment every pocket
 As a theft retardant
 It is no other than 4P THIEF STOP™
 Success and Style
 IF you are the kind of man, that sets trends rather than follows it, and has the confidence to express your individuality and style, Yet the POCKET WILL ALWAYS CARRY THE FLAP
 As it is hinders no fashion
 And will be enthusiastically welcomed by a world wide audience.
 THE STORY OF THE WEB IN CONJUNCTION WITH THE BAG WILL BE SIMILAR.
 We forsee every handbag, travel bag and luggage incorporating this simple device.
 A clear vision THE 4P THIEF STOP DEVICE WILL ENJOY.

1. Cut flap out of Net Lining Preferably as shown in fig.1, to match trouser pocket
 2. Pull out left hand pocket of trouser as shown in fig.2.
 3. Place flap on pulled out pocket as shown in fig.3
 4. Top of flap must always be 15 cm above the bottom of the pocket as shown in fig.4, stitch on dotted line.
 Place valuables under this flap when in use.

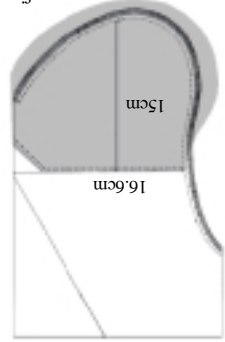

fig 4

over it. The friction between flap and handkerchief makes it work better.
 (6) How can we make it effective?
 Pick pocketing can generally happen when we are out of our normal surroundings!
 (a) The best method is to have all the shirts and trousers, each fitted with a FLAP
 (b) Next as a habit have your valuables placed within the flap Eg. - Credit Card, Excess Cash etc
 (c) BULGING WALLETS ARE TARGET BE CAREFUL.
 (7) Does it hinders Fashion? No - Don't worry it is out of sight, it does not affect FASHION.
 (8) What is this Web ?
 Ladies usually carry their valuables in their hand bags. This web is a protection of valuables (Cards, Cash, Organiser & Jewellery) placed in a bag.
 (9) How does it work ?
 When a thief rips open a bag he easily puts his hand in and steals. However, if only the valuables are placed inside the web, the thief will not be able to touch the valuables.

It's impossible to Rob

If the thief succeeds in ripping the handbag, he can only get at the knick knacks. Even if he gets hold of the purse etc he cannot take it due to the web material placed over it. Still if he succeeds in touching the purse he still cannot take it out without arousing suspicion due to the jerk he will generate when he tries to take the goods due to the entanglement of the goods in the web. (fig3)

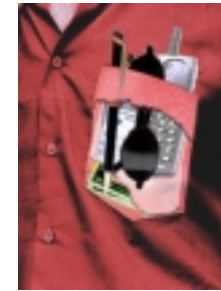

(2) Do we need it ?
 (a) Those who have the rotten experience of being pick pocketed perhaps could answer the question.
 (b) From us it is a simple PRACTICAL PREVENTIVE OPTION - FREE
 (c) Loss is not insurable, not generally reported, victim is only helpless - millions experience it every year !
 (3) How does it work?
 As a practice, Cash, Credit Cards are placed behind the Flap, and the nick-nacks the usual way.... If some body tries to pick pocket they only succeed in spiriting away the nick-nacks as the valuables are behind the Flap.
 (4) Is it 100% FOOL PROOF ?
 This is no sale gimmick.No matter what,if one is careless nothing can help.Being responsible and alert will make it more comfortable to get about without being unfortunately exposed.
 (5) How can I make it work better?
 1. The flap must be made out of very soft material - ideal is net lining.
 2. In the case of trouser pocket, place cotton Handkerchief along with valuables and the flap

My Experience

As I was leaving for Bangkok on Business, I agreed to try out the web, and my bag was fitted within minutes with the 4P THIEF STOP device.
 My most valuables, Passport and Money was placed inside the web and my all other things were also put in to the bag.
 It was so easy to use.
 I could without looking in to the bag, just feel the long plastic handle that fell over to the extreme left side of the bag.
 No other things were put in to the left side - so if you put your hand to the extreme left side - you only get the plastic handle of the 4P THIEF STOP device.
 All I had to do was, pull out the plastic handle which brings out the web with it, and can place the valuables there and just throw over the handle to the left side of the bag.
 All was done on instinct, and by feeling.
 It was amazing - that I felt so secure as it was demonstrated to me.
 I was the person who was initially pickpocketed, I know what it feels to be secure.

How to make the Shirt Pocket.

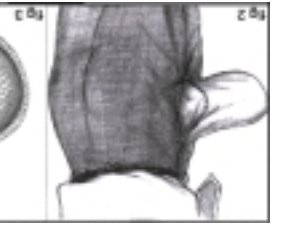

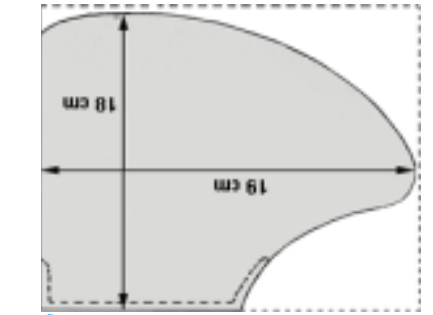

Some usual things in a pocket and the money behind the secret flap

Secret Flap

If a thief tries to pickpocket the money, he cannot do so as the money lies behind the secret flap.

Pocket from behind

All I had to do was, pull out the plastic handle which brings out the web with it, and can place the valuables there and just throw over the handle to the left side of the bag.
 All was done on instinct, and by feeling.
 It was amazing - that I felt so secure as it was demonstrated to me.
